PRACTICAL TRAINING IN ACCOUNTING AND TAXATION

Objectives:

Optimizing Profits

First, a company's income tax accounting should be in line with its operating strategy. That is, to maximize profits a company must understand how it incurs tax liabilities and adjust its strategies accordingly.

Funding Considerations

Secondly, income tax accounting can enable a company to maintain financial flexibility. There are different effects of funding the company's operations with debt and/or equity, and a company's capital structure can influence its tax liability. Knowing these effects will allow the company to plan accordingly and transitively maintain their financial flexibility by keeping their options open.

Timing of Payments

Finally, accounting for tax enables the company to manage cash flow and minimize cash taxes paid. It is beneficial to postpone payment of taxes into the future, as opposed to paying taxes today. A company will want to take tax deductions sooner rather than later to maximize the time value of their money.

Course structure (syllabus: 2015-16)

Unit- I Accounting (Theory 08 hours & Practical 02hours)

- Practical aspects of Journalization
- Practical aspects of Accounting finalization
- Accounting on ERP systems (Tally ERP)
- Inventory Management on ERP systems (Tally ERP)

Unit- II Direct taxes (Theory 20 hours & Practical 05hours)

- Practical approach to salary computation
- Computation of house property
- Practical aspects of capital gains
- Losses set off and carry forward
- Various deductions for incomes
- E-filing of ITR 4 in Tax base
- TDS others
- TDS salaries
- E-filing of TDS
- Correction of TDS

Unit- III MS Excel (Theory 08 hours & Practical 02hours)

- Balance sheet on XLS
- Income Tax computation on XLS
- Tally data export to XLS

Reference books:

1. Income Tax – M.B. Kadakol
2. Computer Application – Biradar and Sannakki
3. Accounting K.D. Basava
