PRACTICAL TRAINING IN ACCOUNTING AND TAXATION

Objectives:

Optimizing Profits

First, a company's income tax accounting should be in line with its operating strategy. That is, to maximize profits a company must understand how it incurs tax liabilities and adjust its strategies accordingly.

Funding Considerations

Secondly, income tax accounting can enable a company to maintain financial flexibility. There are different effects of funding the company's operations with debt and/or equity, and a company's capital structure can influence its tax liability. Knowing these effects will allow the company to plan accordingly and transitively maintain their financial flexibility by keeping their options open.

Timing of Payments

Finally, accounting for tax enables the company to manage cash flow and minimize cash taxes paid. It is beneficial to postpone payment of taxes into the future, as opposed to paying taxes today. A company will want to take tax deductions sooner rather than later to maximize the time value of their money.

Certificate Course In Spoken English

The need for introducing certificate course in Spoken English has been felt since long. Apart from what is generally perceived a weak link in our education system. Feedback received from stake holders. Especially the alumni has impelled us to introduce this course. In addition the management had to take note of the fact that most students are not well equipped to clear competitive examinations. Especially in interview to fulfil their requirements this course is started.
